Tech skills

I enjoy discussing problems and finding possible solutions, especially when working with equally passionate people. I always seek to learn and share my knowledge whenever possible. I like working in **Linux** environments and have familiarity with cloud infrastructure, mainly with **AWS**. Throughout my career, I have developed in different programming languages, including JavaScript/**TypeScript**, Python, C++, and PHP. I have worked with various **frameworks** such as Express, Django, and React. Lately, I have focused my efforts on **NestJS** and **NextJS**. Additionally, I use **Docker** for container creation and management and **Git** for version control. At the same time, this shift has sparked my interest in various **software architecture** paradigms, such as DDD, MVC, TDD, and Clean Code.

Work Experience

Tendam
Madrid, Spain

IT TECHNICAL SPECIALIST & FULL STACK DEVELOPER
Dec. 2024 - Present

- I work with Salesforce Commerce B2C with cartridges and pipelines, and I have experience with Salesforce Commerce Cloud (SFCC) and Demandware.

- Utilizing Jira and Confluence for project management and documentation.

Webmefy - Shopify Plus agency
Madrid, Spain

SOFTWARE ENGINEER & FULL STACK DEVELOPER
Jul. 2024 - Present

- Full Stack development, implementing changes in Shopify frontends using various themes based on Liquid, HTML, CSS, and JavaScript.
- Integrating different systems to add new functionalities to eCommerce platforms, utilizing Shopify's GraphQL, REST, and StoreFront APIs.
- Implementing client services such as ERPs, CRMs, or various web services to enhance functionality.
- Utilizing Amazon Web Services for hosting and deploying backend applications.
- Working closely with clients, maintaining and delivering new projects.
- Applying Agile and Waterfall methodologies, tracking tickets and timelines for efficient project management.

Balloon Group as FastForward
Buenos Aires, Argentina

SOFTWARE ENGINEER & BACKEND DEVELOPER
Jul. 2022 - Jun. 2024

- Self-managing projects from a technical perspective, understanding client needs, and ensuring development quality.
- Participating in the backend team for developing and maintaining software to synchronize Abbott's multi-instance Magento eCommerce with its Salesforce CRM, using technologies like Node.js, TypeScript, Express.js, Sequelize, PostgreSQL, Mocha, and Docker.
- Integrating the eCommerce system with the ERPs and carriers of Abbott's eight main countries in Latin America (Colombia, Peru, Argentina, Brazil, Ecuador, Chile, Costa Rica, and Mexico).
- Creating and maintaining middleware in NestJS, TypeScript, Prisma, PostgreSQL, Redis, Jest, and Docker, implementing functionalities for the eCommerce platforms of various clients like Circle K, VickyForm, and Indumex.
- Utilizing design patterns such as Singleton, Factory Method, Builder, Adapter, Decorator, and Facade.
- Applying authentication methods like OAuth2, JWT, API Keys, and Token-Based Authentication.
- Implementing Git for team collaboration and version control, differentiating between production, development, and testing environments.
- Developing and interacting with REST, SOAP, and GraphQL APIs for system communication.
- Collaborating on infrastructure architecture using Amazon Web Services (AWS) to ensure application scalability.
- Implementing CI/CD pipelines on the GitLab platform.
- Using S/FTP, HTTP/S, SSH, and Webhooks for communications.
- Applying Agile, Waterfall, and Scrum methodologies.
- Utilizing project management tools like Jira, Confluence, and Trello.

Balloon Group as FastForward
Buenos Aires, Argentina
