

Pablo Koll

BACKEND SOFTWARE ENGINEER

Madrid, Spain

📞 +34 663654345 | ✉️ pablokollm@gmail.com | 🌐 pablokoll.com | 🐙 github.com/pablokoll | 🌐 linkedin.com/in/pablo-koll

Backend Software Engineer with 4+ years building transactional systems, enterprise integrations, and multi-tenant platforms at international scale. Experienced designing APIs, **orchestrating** distributed business flows, and integrating ERPs, payment providers, CRMs, and carrier systems across multi-country operations. Strong focus on reliability, maintainability, scalability, and translating complex operational requirements into robust **software systems**. Comfortable leveraging **AI-assisted workflows** to accelerate development, validation, and operational efficiency.

Work Experience

Tendam

Madrid, Spain

BACKEND ENGINEER | PLATFORM & INTEGRATIONS

Dec. 2024 - Present

- Contributed to migrating a large-scale integration layer to a new OMS covering the full order lifecycle: orders, invoices, returns, and exchanges.
- Integrated 3 global payment providers (Adyen, Redsys, Cybersource) into a high-throughput transactional platform processing ~10k daily events across 12 brands and ~80 countries.
- Delivered billing systems ensuring compliant invoice flows across multiple tax jurisdictions.

Webmefy

Madrid, Spain

FULL STACK ENGINEER | TECHNICAL OWNER

Jul. 2024 - Dec. 2024

- Sole technical owner for multiple client projects, leading from requirements and architecture to production deployment.
- Designed and built backend integrations connecting a high-traffic commerce platform with ERPs and third-party services via REST, GraphQL, and Storefront APIs, ensuring reliable order and inventory data flow.
- Configured CI/CD pipelines and managed AWS infrastructure (EC2, S3, Lambda) end-to-end, reducing manual deployment overhead.

Balloon Group

Buenos Aires, Argentina

BACKEND DEVELOPER & SYSTEM INTEGRATIONS

Jul. 2022 - Jul. 2024

- Architected a multi-tenant middleware platform orchestrating order, invoice, stock, pricing, and product flows for 4 enterprise clients, each with distinct ERPs, carrier systems, and data models.
- Engineered a bidirectional data pipeline syncing two enterprise systems (ERP → CRM) for Abbott across 8 Latin American countries, handling catalog, orders, and CRM data in real time.
- Designed async processing flows using Redis and BullMQ to decouple transactional operations, improve fault tolerance, and scale webhook orchestration workloads.
- Enforced unit and integration test coverage as a team standard, reducing regression rate in production releases.

Balloon Group

Buenos Aires, Argentina

FULL STACK DEVELOPER

Nov. 2021 - Jul. 2022

- Developed React components and admin panel features across multiple client-facing web applications.
- Launched Vue.js landing pages for Toyota (Hino trucks), achieving SEO and performance targets within tight delivery timelines.

Henry Bootcamp

Remote, LATAM

FULL STACK TEACHING ASSISTANT

Aug. 2021 - Oct. 2021

- Mentored Full Stack development students through exercises, code reviews, and pair programming sessions.
- Coordinated student groups and proposed curriculum process improvements adopted by the team.

Featured Projects

Freelance Project

Madrid, Spain

KIT CUSTOMIZATION WIDGET - INTERACTIVE PRODUCT CONFIGURATOR

Nov. 2025 - Jan. 2026

- Built a real-time product configurator widget handling multiple simultaneous dimensions (kits, competitions, presets, badges, gender variants) with dynamic filtering logic across all combinations.
- Consumed a GraphQL API to drive live product and inventory data, with validation state reflecting selection combinations in real time.

Freelance Project

Madrid, Spain

KIT IMAGE GENERATOR - AUTOMATED ASSET GENERATION MICROSERVICE

Sep. 2025 - Dec. 2025

- Reduced image generation time by 80% (15s → 3s) through browser pool management with pre-warmed headless browser pages.
- Secured webhook ingestion with dual-signature validation (HMAC + TTL) and reduced redundant processing via smart caching, cutting unnecessary executions.

Tech Skills

Languages	TypeScript, JavaScript, Python, Go, C/C++
Backend	Node.js, NestJS, Express.js, REST APIs, GraphQL, Webhooks, SOAP
Architecture	Event-driven systems, multi-tenant platforms, distributed integrations, microservices
Infrastructure	Docker, AWS (EC2, S3, Lambda), Redis, PostgreSQL, CI/CD (GitLab, GitHub Actions)
Frontend	React, Next.js, Vue.js, Tailwind CSS
AI & Tooling	AI-augmented development, LLM workflow integration, automation pipelines

Education

National Technological University (UTN FRGP)
ASSOCIATE DEGREE IN INFORMATION SYSTEMS

Buenos Aires, Argentina
Mar. 2022 - Dec. 2025

- Currently pursuing an Associate Degree in Information Systems with focus on computer science fundamentals.
- Core curriculum: C/C++ programming, data structures and algorithms, database design and management, operating systems, computer architecture, and software engineering principles.

Henry
FULL STACK WEB DEVELOPER

Online, Latam
Jul. 2021 - Oct. 2021

- Obtained Full Stack Web Developer certification.
- Comprehensive JavaScript full stack curriculum: React, Node.js, Express.js, PostgreSQL, Sequelize ORM, RESTful APIs, Git, Agile methodologies, and software development best practices.
